

300 S TRYON

CHARLOTTE, NC

300 South Tryon is a premier Class AA office tower in Uptown Charlotte and the headquarters of Barings (formerly Babson Capital). As one of the city's most sought-after commercial office buildings, the property required reliable, high-performance in-building cellular coverage to support today's connected workforce.

Airwavz Solutions designed and deployed a robust neutral-host Distributed Antenna System (DAS) that delivers seamless indoor cellular connectivity throughout the building including the parking garages. Supporting both Verizon and AT&T, the scalable solution enhances the tenant experience while providing the reliable wireless infrastructure expected in one of Charlotte's premier Class AA office properties.
